

QUINTA SOLUTIONS

AFRICA GREENHOUSE

*Tailored-design solution suitable for
Sub Sahara Africa (SSA)*

Overview

- Unique
- Customizable
- Tested in Africa

Greenhouse Properties

1-ROBUST STRUCTURE

- Made of galvanized steel tubes able to resist harsh climate variations and hard wind conditions.
- Reinforcements and wind breakers included to fortify the structure.

2-CROP HOLDER

Designed with built in crop support installed on each arch, can hold more than 16Kg/m².

3-NATURAL VENTILATION

Designed with ridge ventilation & high vertical side walls for optimal heat discharge & natural indoor climate regulation.

4-SAFETY ACCESS SYSTEM

Consisting of 1 outer and 1 inner door installed with 1m clearance in between to prevent contamination.
